Professional Summary

Software Engineer with 1 year of professional experience at Fidelity Investments building scalable Java/Spring Boot microservices, RESTful APIs, and Angular UIs. Proven track record in full-stack development, automation testing (Cypress, JUnit 5, Cucumber), and CI/CD delivery via Jenkins. Skilled in Agile/Scrum, Oracle DB, Apache Kafka, and AWS cloud deployments. Passionate about writing clean, testable code and delivering high-quality software at scale.

Technical Skills

Languages	: Java, HTML, CSS, JavaScript
Frameworks & Libraries	: Spring Boot, Spring MVC, Hibernate, Angular
Database	: MySQL, SQL, Oracle, Spring Data JPA
Testing	: JUnit 5, Karma, Jasmine, Cypress, Mockito, Cucumber, Rest Assured, Maven, TestNG
CI/CD & DevOps	: Jenkins, Git, CI/CD Pipelines, AWS (EC2, RDS, S3, Lambda)
Performance & Quality	: SonarQube, Code Quality Analysis
Messaging & Architecture	: Kafka, Microservices, RESTful APIs
Tools	: SonarQube, Postman, Insomnia, IntelliJ IDEA, Jira, VS Code
Methodologies	: Agile/Scrum, TDD, BDD, Code Reviews

Experience

Fidelity Investments

Sept 2024 – Sept 2025

Software Engineer

- Developed and maintained scalable microservices using Java, Spring Boot, and Oracle DB, improving backend performance and system availability.
- Designed RESTful APIs enabling seamless UI-to-backend communication, reducing latency and improving data processing efficiency.
- Built dynamic UIs with Angular, HTML, CSS, and JavaScript, enhancing responsiveness across web applications.
- Optimized SQL queries and integrated Oracle DB via JDBC, improving data retrieval throughput.
- Wrote unit and integration tests with JUnit 5, Karma, and Jasmine; created API automation tests with Insomnia; integrated suites into Jenkins CI/CD pipelines.
- Enforced code quality via SonarQube; maintained Git version control through code reviews and branching strategies.
- Collaborated in Agile/Scrum ceremonies—sprint planning, retrospectives, and daily stand-ups—ensuring timely, high-quality delivery.

Projects

Mutual Funds and Trade Recommendation Application | Java, Spring Boot 3, Apache Kafka, REST APIs, AWS, MySQL

- Built microservices with **Java** and **Spring Boot 3**, implementing **RESTful APIs** for real-time mutual fund analysis and personalized investment recommendations.
- Integrated **Apache Kafka** for event-driven, asynchronous inter-service communication, enabling scalable processing of trade signals.
- Developed end-to-end **Cypress + Cucumber (BDD)** automation suites covering critical user journeys, improving release confidence and cutting manual testing effort.
- Implemented unit/integration tests with **JUnit 5** and **Mockito**; enforced high code coverage via **SonarQube** to reduce regression risk.

Education

Siddhartha Institute of Science and Technology

2019 – 2023

Bachelor of Technology in Electronics and Communication Engineering

Achievements

- Certified as a **JAVA FULL STACK DEVELOPER** from Pentagon Space, Bangalore.2023
- Completed courses Java Spring Framework and Spring Boot and JUnit and Mockito on Udemy2026
